Summary

Product designer, five years in regulated high-density enterprise software — UX and UI across approval workflows, multi-role marketplaces and operational dashboards. Design lead from research through development handoff on a life-sciences platform now live in production at a Fortune 500 manufacturer, where a six-month Figma prototype closed the deal before development began. Experience spans pharma procurement, material and batch inventory, fleet telematics and energy management.

Experience

Senior UI/UX Designer — Mfable Creative Labs

September 2024 – Present · Pune, India

- Design lead across 4+ B2B enterprise products and 15+ projects delivered overall, running client requirements, information architecture, user flows, interface design, prototyping and design systems through to development handoff.
- Direct junior designers and interns while owning product direction and client relationships; promoted after clients began requesting continuity across engagements.
- Built and maintain design systems spanning multiple component libraries, including a 55-variable, four-theme token architecture supporting tenant-level white-labelling.

UI/UX Designer — Mfable Creative Labs

June 2023 – September 2024 · Pune, India

- Design lead on TraceFlow from inception: research, information architecture, user flows, prototype and design system.
- Delivered the six-month prototype used to close a Fortune 500 manufacturing client, followed by eight months of development and deployment at the client site.

Design Intern — Mfable Creative Labs

February 2023 – May 2023 · Pune, India

- Wireframing, UI design and prototyping on enterprise product work; converted to full-time.

Visual / UX / UI Designer — EG Allied Pvt. Ltd. (Part-time)

March 2020 – March 2022 · Jaipur, India

- Owned design across digital products and marketing assets, UI concepts through to brand consistency, alongside an undergraduate design degree.

Design Intern — Kompanions

December 2017 – May 2018 · Chandigarh, India

- Wireframes, prototypes and user flows for web and mobile; user research and usability testing.

Selected Work

TraceFlow — Tryft · material, batch and obsolescence management · live in production

- Design lead from inception. Node-graph explorer for tracing material relationships across five material types, and a branching approval engine modelled as a state machine rather than a form.
- Client reports 50% faster material investigations, 90% fewer manual reviews and a 45% reduction in write-offs.

Trudo — Tryft · compliant B2B transaction infrastructure · in development

- Proposed and designed the trust model that became the platform's differentiator: site-level risk scoring, regulator audit history and derived trust bands surfaced at the point of transaction.
- Complete prototype in six months across buyer, vendor and auditor roles; client requested me specifically on the strength of prior work.

Stark 1 — Starkenn Technologies · ADAS fleet safety ecosystem

- Unified five hardware modules into one in-cab dashboard operated at speed, plus the customer platform and super-admin console; designed for low-literacy users via icon-led navigation and motion-based alert severity.

Greenovative — energy management across ten industries

- Design lead and client point of contact across a three-year engagement: a three-sided platform of customer app, partner app and admin console, with light and dark themes carried as parallel first-class tracks.
- Led design for Advance AI and Quick AI, two AI capabilities introduced into the legacy platform, from research through to interface within existing surfaces.
- Used by manufacturers including Coca-Cola, Novartis, Carlsberg Group and Tata Motors, across ten industrial sectors.

Skills

Design: Product design, UX design, UI design, interaction design, design systems, information architecture, user flows, wireframing, prototyping, user research, usability testing, data-dense interfaces, responsive design, accessibility

Tools: Figma, Figma Make, Framer, Fluent UI, IBM Carbon, HeroUI Pro, Apache ECharts, Claude Code

Working: Client communication, requirements gathering, stakeholder management, developer handoff, mentoring

Languages: English, Hindi

Education, Achievements & Certifications

B.Des, Visual & Communication Design — P.P. Savani University · 2019 – 2023

Gold Medalist, Graduation Project — P.P. Savani University, 2023 · 10 CGPA

UI Design Nominee — IFP International Design Award, 2023 · **Certifications** — Elements of UI Design, California Institute of the Arts, 2021
